Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 13-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Perrone (5,669,277) in view of Saitoh et al. (6,241,234).

Perrone discloses the invention substantially as claimed including a sheet punching device, die holes 44, a plurality of punch trains (Fig. 1 and 2), a plurality of punches 42, a first rotatable shaft 16 and a second rotatable shaft 18. Perrone does not show initial position detecting means and a sheet end detecting means. However, Saitoh teaches the use of initial position detecting means 71 and a sheet end detecting means 31 for the purpose of accurately punching the sheet at a predetermined position. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Perrone's device by providing initial position detecting means and a sheet end detecting means as taught by Saitoh in order to obtain a device to accurately punch the sheet without stopping the sheet.
